

LR-6 - Alkaline Battery

Alkaline batteries AA size, from PANASONIC

- For consumers with high power consumption
- Long storage life
- 4 pcs.

It is advisable to use new alkaline batteries for each live performance. Of course, the application of rechargeable batteries is still possible. However, alkaline batteries are clearly beneficial. Beside the longer life, the main difference can be noticed with decreasing capacity. With rechargeable batteries an immediate loss of performance occurs due to the discharging characteristics. The operating voltage cannot be maintained. The voltage of alkaline batteries drops gradually and there would be sufficient time to prepare for a change. Thus, the low-battery indication only works reliably with alkaline batteries.

Tekniske data

Rated voltage	: 1.5 V
Type	: AA size
IEC	: LR6
ANSI	: AA
Capacity	: 3,400 mAh
Technology	: alkaline-manganese
Quantity	: 4
Capacity	: -
Charging current	: -
Charging time	: -
VdS No.	: -
Panasonic No.	: -
Hazardous good	: -
UN number	: -
Hazard identification number	: -
Hazardous materials class	: -
Dimensions	: 14 mm x 50 mm
Weight	: 25 g/pc.
Connections	: -
Other features	: non-rechargeable
